Standard

New South Wales Rural Fire Service

$875 (includes GST, current Jan. 2026)

The Standard Kit is a popular choice for volunteer brigades and training teams. This version has been customised for the NSW Rural Fire Service and is packed in a durable 45-litre storage box.

This kit is often ordered with the Enhanced Kit which adds even more options and is great for scenarios in the Rural Urban Interface.

The Standard Kit includes many commonly used rural fire components, while an even wider range of options is available through the Design Your Own Model form on the website.

Ordering is as simple as letting us know which kits you would like. If you prefer to customise the contents, please complete this form (pages 12 - 15) and email it to info@bushfiremodel.com.au for a quote.

Standard

Aircraft

Item	Quantity
